Seed and Planting Stock Dealers

U.S. Department of Agriculture
Forest Service
FS-331

The purpose of this directory is to provide a list of possible vendors that sell the more common forest tree and shelterbelt seed and plants. It is published for the convenience of seed and planting stock buyers. Some of the common species are not listed because no dealers indicated they could supply seed or plants of those species.

The information in this directory has been compiled from data furnished by the dealers who responded to a letter sent to all commercial dealers of which the Forest Service of the U.S. Department of Agriculture and the State Foresters had a record. Endorsement of the dealer or his products is not intended and must not be inferred.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

SEED AND PLANTING STOCK DEALERS

A Directory of Dealers That Sell The More
Common Forest and Shelterbelt Seeds and Plants

Commercial sources of seed and planting stock for the more common forest and shelterbelt trees and shrubs	11

GEOGRAPHIC ORIGIN OF SEED

Most of the dealers of seed and plants in this directory of commercial dealers in seeds and planting stock for common trees and shrubs will, upon request, furnish data on seed origin for the seeds and plants they sell. Some dealers certify seed.

Research in this country and other countries has proved the general superiority of forest and shelterbelt plantings made with planting stock from seed of local origin. Seed of local origin is seed from an area subject to similar climatic influence usually within 100 miles of the planting site and differing in elevation by less than 1,000 feet.

If seed or planting stock from seed of local origin is not available, the best second choice would be that from a region having environmental factors comparable to those at the planned planting site. Such factors include length of growing season, day length, maximum and minimum growing season temperatures, and rainfall amount and distribution.
